## Business Description and Key Statistics

e-Therapeutics Plc is a drug discovery platform company. It is engaged in developing a computational approach to drug discovery, leveraging network biology to capture and interrogate human disease complexity. Its biology-led silico laboratory enables hypothesis generation, phenotypic screening and the identification and prioritization of novel therapeutic targets. It has developed a proprietary GalNAc-siRNA platform technology for specific silencing of gene expression in the liver. Its computational platform includes HepNet, a hepatocyte-specific, computational biology platform that enables identification of target genes to unlock differentiated therapeutic development at scale. Its GalOmic platform is its proprietary ribonucleic acid (RNA) Interference (RNAi) chemistry platform. In combination with HepNet, it offers end-to-end capabilities for rapid identification of novel disease-associated genes and drug candidate development of therapies with disease-modifying potential.
