Business Description and Key Statistics

Kenmare Resources plc is an Ireland-based mining company. The Company operates the Moma Titanium Minerals Mine, located on the northeast coast of Mozambique. The Company is a producer of mineral sands products. The Company's products are raw materials consumed in items, such as paints, plastics and ceramic tiles. The Company produces titanium feedstocks, supplying approximately 25 customers operating in more than 15 countries. It has three mining ponds where dredges mine titanium-rich sands. 3-5% of the ore contains heavy minerals, which are removed and separated at its plant into four final products: ilmenite, zircon, rutile and mineral sands concentrate. These products are then loaded onto ocean-going vessels at its dedicated port facility. The Company also produces a small quantity of monazite (a mineral containing rare-earth elements) as part of a mixture of products in a concentrate.
